

EO/DD/S&T

Subject: Themes for Summer Study Session

As you know, OEL faces a complex task of reducing more and more data and operating more and more collection equipment without corresponding changes in our personnel levels. We feel we can do this successfully through the introduction of [redacted] in the collection process and greater use of automation in data reduction. It would be profitable from our viewpoint if a summer study session group comprised of [redacted] experts could provide recommendations for incremental incorporation of these techniques in OEL equipment and operating procedures.
